Benefits

- Once open, wine in the KeyKeg will last a minimum of four weeks.
- No air ever contacts the wine during the dispensing/pouring process ensuring the wine reaches the customer as the winemaker intended.
- Using the KeyKeg diminishes CO2 emissions by up to 125%.
- The KeyKeg uses far less energy and resources in its production, resulting in minimal environmental impact.
- The one way keg is designed to inflict low impact on the environment. Minimal materials are used and are recyclable friendly. The PET container can be crushed and recycled.
